Intuitive AI Powered Student Processing for
Higher Education

- 20+ Years in business
- Washington University & more college customers
- Workday Integration
- 5X Microsoft Partner of the Year
- SOC 2 Type 2 Compliant
- Very easy to use

KnowledgeLake's Cloud-native 4-point automation platform seamlessly processes, digitizes, organizes, and classifies content across diverse formats. With its Intuitive AI capabilities, essential data is extracted and efficiently directed to designated recipients within the appropriate system.

Moreover, our intelligent access feature empowers universities to swiftly and securely retrieve pertinent information from any operational tool. This transformative solution enables universities to transition from labor-intensive document handling to enhancing the delivery of educational services.

Accelerate your university's mission with digital labor.

KnowledgeLake's digital labor provides universities with unparalleled efficiency in essential administrative operations, ranging from general administration to student processing, human resources, and financial aid management.

Leveraging Intuitive AI powered Workflow Automation, our solution enhances workflows within and across departments, reducing errors, enhancing accuracy, and preventing missing paperwork.

Solution Features

- Unlimited users
- Process automation driven by machine learning and RPA.
- Cloud-native
- Integrates with all ERP, workflow engines, and line of business systems.
- Up and running in hours – Not months.
- Leverage existing systems.
- Consumption-based pricing.

Solution Value

- Enhance educational services delivery.
- Eliminate errors, ensure accuracy, and avoid missing paperwork.
- Easily configure case management and document workflows.
- Migrate documents from outdated ECM or legacy document management platforms and systems, without the pain of endless IT projects.

"Besides the fact that KnowledgeLake's products are unmatched by their competitors in terms of ease of use, integration with known products and cost, they're a great company to work with, and we can trust them."

Denise Hirschbeck, Assistant Vice Chancellor for Information Services and Technology, Washington University in St. Louis

"KnowledgeLake is part of a tapestry of technology that is helping us solve really important business processes. That streamlining of processes, has been really, really valuable"

System Engineer, Public Minnesota university

Accelerate student processing & lower costs with Digital Labor at scale.

KnowledgeLake offers a top-tier, Intuitive AI-powered enterprise automation platform for Universities. It combines Intelligent Document Processing (IDP), Workflow Automation, Intelligent RPA, and Content Management in a scalable, cloud-native platform. KnowledgeLake enables digital labor to optimize crucial business processes, boosting productivity and cost savings while improving student services.

Drive Business Value with our 4-Point Automation Platform

Adaptive Intelligent Document Processing (IDP): Efficiently manage and process vast volumes of documents by employing IDP, reducing manual entry errors and enhancing data accuracy.

Workflow Automation: Custom workflow automation enables organizations to streamline their unique processes, significantly improving operational efficiency and reducing the time and effort spent on routine tasks.

Intelligent Robotic Process Automation (RPA): RPA automates repetitive and time-consuming tasks, freeing up human resources for more strategic, high-value activities and increasing overall productivity.

Content Management: Integrated content management provides a centralized, secure, and accessible platform for storing and managing digital content, simplifying information retrieval and collaboration, thus enhancing decision-making and compliance.

Built on Microsoft Azure

It's what gives our intelligent document processing solutions unlimited storage and all the benefits of enterprise-grade scalability, flexibility, and security.

Seamless Workday Integration

KnowledgeLake connects to Workday via an 'at rest' API to enable data to flow seamlessly to and from Workday's Student Management module. Student processing data from any document can all be intuitively read without code. The data is easily used in an 'automated workflow' to process admissions or other student processing management.

Customer Experience Portal

Engage with applicants and external users at every step of the business process with a purpose-built portal.
