KnowledgeLake

KnowledgeLake and Microsoft: Redefining Content Management

- 5X Microsoft Partner of the Year
- Gold Certified ISV
- 2020 Gov Partner of the Year Award

Integrations
- Migration Expertise
- Built on Azure
- Azure Certified

Solution Features

- Office add-in allows ingesting emails right in Outlook.
- File Import allows a 'drop folder' for automatic ingestion & processing.
- Instantly create simple or very complex automations.
- 'Targeted searches' enables documents to be found quickly.
- Iron-clad security at the document level or the specific search level. We honor SharePoint's content security, eliminating the need for double setup.

The integration of KnowledgeLake with Microsoft 365 and SharePoint offers a seamless content management experience. Organizations can now leverage the familiarity and versatility of Microsoft 365 applications while harnessing KnowledgeLake's intelligent content processing capabilities. Say goodbye to siloed data and disconnected processes and welcome a unified content management solution that enhances collaboration and productivity across your organization.

Built on Azure

- KnowledgeLake leverages Microsoft Azure for unlimited cloud storage, offering unmatched scalability, flexibility, security, and compliance in intelligent document processing.
- Customers using KnowledgeLake gain the most advanced cybersecurity infrastructure available. Azure's state-of-the-art security keeps you and your assets protected 24/7.
- Customers can use KnowledgeLake within Microsoft 365 GCC and GCC High, public clouds ensuring federal information and cybersecurity compliance.

Empowering Microsoft 365

- **ECM Capabilities**: By incorporating IDP, workflow, and content management, KnowledgeLake elevates Microsoft 365 into a comprehensive modern Enterprise Content Management (ECM) system.

Maximizing Copilot's Output

- **Migrate to SharePoint:** Migrate to SharePoint to support your modern workforce, make all your content full text searchable and tagged for easy access by Copilot.
- **Capture and Digitize:** KnowledgeLake helps you get the most value from Copilot. It refines content within Microsoft 365, ensuring users receive optimized results. Embedded Machine Learning allows automatic classification & extraction.

Enhancing the Syntex IDP Solution

- **True Omni-Channel Capture:** Capture content from any source, from desktop uploads to enterprise scanning, ensuring reliable delivery to SharePoint Syntex.
- **Intelligent Content Routing:** Leverage your existing SharePoint sites and taxonomy; KnowledgeLake intuitively routes captured content to the appropriate Syntex libraries.
- **Powerful Search for SharePoint:** KnowledgeLake's search quickly locates content across SharePoint sites, showing users only what they're permitted to access, with both generalized keyword searches for browsing and targeted searches for precise needs.
- **Add-Ins for Office:** KnowledgeLake's Add-Ins let you send files to SharePoint Syntex from both online and desktop versions of Outlook, Excel, Word, and PowerPoint.

Securely manage and optimize the entire process of document capture, ingestion, classification, reviews & approvals, and lifecycle management with KnowledgeLake. The combination of Microsoft and KnowledgeLake enable enterprises to achieve unparalleled accuracy and consistency in complex, high-volume document processing.

Our industry-leading automation platform plus our deep integration with Microsoft can help lower costs, boost efficiency, and eliminate the risk associated with lost and misfiled data.

KnowledgeLake is built on Microsoft Azure. It's what gives our intelligent document processing solutions unlimited cloud storage and all the benefits of enterprise-grade scalability, flexibility, security, and compliance.

The Value of the KnowledgeLake and Microsoft Partnership:

- **Streamlined Workflows:** Simplify your content management processes with seamless integration between KnowledgeLake and Microsoft 365, ensuring smooth document handling, access, and sharing.

- **Efficient Document Processing:** Unlock the power of AI-driven document processing by combining KnowledgeLake's intelligence with SharePoint Syntex, eliminating manual tasks and accelerating information extraction.

- **Enhanced Collaboration:** Promote cross-functional collaboration and information sharing with centralized content management, accessible to authorized users anytime, anywhere.

- **Data Visibility and Compliance:** Maintain regulatory compliance with improved data visibility, version control, and auditing capabilities within the integrated Microsoft ecosystem.

- **Time and Cost Savings:** Experience significant reductions in time spent on manual content management, enabling your teams to focus on more strategic tasks that drive business growth.

"

Besides the fact that KnowledgeLake's products are unmatched by their competitors in terms of ease of use, integration with known products and cost, they're a great company to work with and we can trust them."

Denise Hirschbeck, Assistant Vice Chancellor for Information Services and Technology, Washington University in St. Louis
