

# The Smartest Way to Modernize ECM

- 20+ Years in business
- Sealed Bidding Compliant
- 5X Microsoft Partner of the Year
- SSL/TLS encryption for all connections
- SOC 2 Type 2 Compliant
- HIPAA Compliant

KnowledgeLake is the smartest way for companies to migrate content to the Cloud and modernize legacy Enterprise Content Management (ECM) systems. Our turnkey, Cloud-native SaaS combines RPA, workflow, and intelligent document processing in a single user-friendly, cost-effective platform that enables employees to improve key business processes like onboarding, invoicing, and payments.

Securely manage and optimize the entire process of document capture, ingestion, classification, reviews & approvals, and lifecycle management in one ECM system. By leveraging intuitive AI and machine learning, KnowledgeLake enables enterprises to achieve unparalleled accuracy and consistency in complex, high-volume document processing. Our industry-leading automation platform can help lower costs, boost efficiency, and eliminate the risk associated with lost and misfiled data.

## Solution Features

- Unlimited users
- Process automation driven by machine learning and RPA.
- Cloud native
- Integrates with ERP, workflow engines, and line of business systems.
- Up and running in hours with effortless scalability
- Leverages your existing systems.
- Consumption-based pricing

## Solution Value

- Accelerate public service delivery.
- Eliminate errors, ensure accuracy, and avoid missing paperwork.
- Easily configure case management and document workflows.
- Migrate documents from outdated ECM or legacy document management platforms and systems, without the pain of endless IT projects.

“KnowledgeLake has significantly cut down on the amount of time it takes users to complete a process end to end and is generally quick and easy to use.”

Rishi Gulhar, Enterprise Services Team,  
Montgomery County, Maryland

“By adding the KnowledgeLake platform, we were able to bridge the gap on the pieces that were missing in SharePoint to help make going digital a reality.”

Viridis Gamble, Productivity Services Manager, SFMTA

## SOC 2 Type 2 Compliant

KnowledgeLake is committed to providing the highest level of security to our customers. That's why we undergo an annual 3rd Party System and Organization Controls (SOC) 2 Audit to provide ongoing assurance that we have measures in place to protect your data.

## Data Center and Network Security

We host all our software in Microsoft Azure datacenters. Microsoft provides an extensive list of compliance and regulatory assurances, including SOC 1-3, and ISO 27001.

NAICS: 56561    CAGE Code: 5M1N8    SIC: 73738    DUNS: 005286310

KnowledgeLake is built on Microsoft Azure. It's what gives our intelligent document processing solutions unlimited cloud storage and all the benefits of enterprise-grade scalability, flexibility, security, and compliance.

Besides the fact that KnowledgeLake's products are unmatched by their competitors in terms of ease of use, integration with known products and cost, they're a great company to work with and we can trust them."

Denise Hirschbeck, Assistant Vice Chancellor for Information Services and Technology,  
Washington University in St. Louis
